

Figure 2
Stream-cut benches of the
Boise River Floodplain

This map shows the distribution of stream-cut benches (aka terraces) in the SBWC service area. Heavy black lines show the interpreted crests of the benches; solid blue area shows the distribution of the South Boise Bench. Location of the ancestral Boise River shown in light blue diagonal hatch is from the original 1868 Government Land Office survey. Present-day Roads are shown for geographic reference.

- SBWC Service Area Boundary
- Crests of river-cut terraces
- 1867 Mill Ditch
